PROFESSIONAL SUMMARY

Motivated Full Stack Software Engineer with a Bachelor's degree in Software Engineering and hands-on experience in web development, database systems, server deployment, IT support, data science, and customer service. Skilled in building responsive web applications with Vue.js, Vuetify, React.js, Laravel, PHP, MySQL, and REST APIs. Experienced with Ubuntu Server, Nginx, PHP-FPM, Git/GitHub, LAN support, hardware/software troubleshooting, and internal system maintenance. Comfortable working with remote teams, teaching students, supporting customers, and solving technical problems with clear communication.

CORE SKILLS

Frontend	Vue.js (Advanced), Vuetify, React.js, React Native, HTML, CSS, JavaScript, responsive UI, UI components, Axios, API integration
Backend	Laravel (Advanced), PHP, REST API development, Laravel Sanctum, CRUD systems, authentication, system design, backend logic
Database	MySQL, PostgreSQL, database design, database maintenance, data management, data accuracy, backup and recovery, query optimization
Data Science	Data pipelines, ML models, predictive analytics, data visualization, data analysis, reporting
Servers	Ubuntu Server, Windows Server, Nginx, PHP-FPM, deployment, domain setup, server maintenance, performance support
IT Support	LAN/WAN troubleshooting, network cabling, hardware/software troubleshooting, printers/scanners, PC and laptop maintenance, user accounts
Tools & Work	Git, GitHub, Microsoft Office, video meeting setup, customer service, technical documentation, remote teamwork, mentoring

WORK EXPERIENCE

Software Engineer & Full Stack Web Developer / Customer Service Support | 2026 - Present
Elite Valley Company, Kabul

- Developing and maintaining company web systems and internal tools.
- Developed and maintained database structures for company systems.
- Worked on data accuracy, system maintenance, and daily technical support.
- Supported customers by answering questions, collecting feedback, and solving service issues.
- Helped improve backend workflows, user experience, and system reliability.

WORK EXPERIENCE CONTINUED

English & Computer Instructor | Current Faza English and Computer Academy

- Teaching English language and practical computer skills to academy students.
- Helping students build strong foundations in both language and computing.

Instructor | 2025 Afghanistan Open University · Online

- Teaching software development, programming, and system design.
- Delivering labs, projects, and assessments that emphasize real-world delivery and best practices.

Full Stack Developer (Remote) | 2025 - Present Ronika Brand, Kabul

- Developing and maintaining full-stack web applications.
- Working with Vue.js frontend and Laravel backend.
- Collaborating with remote teams and handling real-world tasks.
- Improving system performance and user experience.

Data Science Engineer | 2025 Beyond Data.in · India (Remote)

- Building data pipelines and ML models for production use.
- Delivering predictive analytics and stakeholder-ready visualizations.
- Integrating data science into production with a focus on quality and scale.

Frontend & Full Stack Developer (Intern) | 2023 - 2025 Elite Valley, Kabul

- Year 1 - Built responsive web interfaces using JavaScript, Vue.js, and UI components.
- Worked with APIs, frontend logic, and user experience improvements.
- Year 2 - Developed full-stack applications using Vue.js and Laravel.
- Built REST APIs, database structures, and production-level project features.

Web Development Instructor (Volunteer) | Current Teaching & Volunteer Experience, Kabul

- Teaching university students Vue.js, Laravel, and MySQL.
- Helping students build real-world projects.
- Mentoring and guiding junior developers.
- Training students in Microsoft Office and practical computer use.
- Supporting users with basic troubleshooting and software guidance.
- Delivering step-by-step technical instruction to learners with different backgrounds.

Computer Skills Trainer (Volunteer) | 2023 - 2025 Kabul University

- Teaching Microsoft Office, including Word, Excel, and PowerPoint.
- Supporting students from non-technical departments.

Data Management & Internal System Support | Related experience Government environment

- Contributed to data management and internal system development.
- Supported daily digital workflows and office system improvements.
- Worked carefully with records, system updates, and practical user support.

SELECTED PROJECTS

EliteBookPro — ERP System (Full Stack)

- A full ERP platform for business management, built as a team project at Elite Valley for real production use.
- Contributed to the web development of the system — frontend features, backend logic and database structures.
- Stack: Vue.js, Laravel, MySQL.

<https://elitebookpro.com>

EliteBookPro — Live Demo (Full Stack)

- The live demo environment of our ERP platform, open for anyone to explore — a team project I contributed to.
- Demo login: admin@elitevalley.af / 123456.

<https://demo.elitebookpro.com>

Hammad Chemical Company Website (Frontend)

- Company website for Hammad Chemical with a Dari-language interface, deployed on Vercel.
- Built with React; bilingual UI reachable at /fa for Dari visitors.

<https://hammadchemicall.vercel.app/fa>

Internal Business Apps — HR & HEMIS (Full Stack)

- Built a range of offline and non-published business applications — HR systems, HEMIS-related tools and company websites.
- Covered the full journey from database design to deployment for real internal use.

Employee Management System (Full Stack)

- Developed a full-featured employee management system using Vue.js, Vuetify, Laravel, and MySQL.
- Implemented secure authentication using Laravel Sanctum and REST APIs with Axios.
- Built a real-time chat system using Laravel Reverb with advanced messaging features.
- Integrated voice and video calling inside the chat module.
- Added file sharing for documents, images, and media.
- Implemented real-time notifications for system activities and messages.
- Designed a responsive and user-friendly UI using Vuetify.
- Handled both frontend and backend as a Full Stack Developer.

Clothing Shop Management System (Full Stack)

- Developed a database-driven system for managing a clothing shop.
- Built the frontend with Vue.js and the backend with Laravel.
- Designed and managed MySQL database tables for products, sales, and customers.
- Implemented CRUD operations for inventory and order management.
- Created a clean and responsive user interface for shop management.

Real-World Internship Projects (Full Stack)

- Worked on multiple real-world projects during internship at Elite Valley.
- Developed frontend interfaces using Vue.js and integrated APIs.
- Built backend systems using Laravel and MySQL.
- Collaborated with team members to deliver production-level applications.
- Improved performance and optimized application workflows.

Web Applications Deployment & Server Management

- Deployed web applications using an Ubuntu server environment.
- Configured Nginx and PHP-FPM for production hosting.
- Managed domain setup and server performance optimization.
- Handled application deployment and maintenance tasks.
- Supported system stability and security in production environments.

EDUCATION

Bachelor Degree in Software Engineering | 2021 - 2025

Kabul University, Kabul

- Studied software engineering, programming, database systems, and web development foundations.

High School Diploma | 2009 - 2021

Dar-ul-Huda Private High School, Logar

TECHNICAL STRENGTHS

STRENGTHS

- Strong problem-solving skills
- Ability to work independently and remotely
- Fast learner and adaptable
- Team collaboration and communication
- Teaching and mentoring ability
- Customer-focused support mindset

ACHIEVEMENTS

- Developed multiple real-world full-stack applications
- Successfully deployed applications on Ubuntu servers using Nginx and PHP-FPM
- Recognized for strong skills in Vue.js and Laravel development
- Experienced in building scalable and maintainable systems
- Hands-on experience with database design, maintenance, and internal tools

LANGUAGES

LANGUAGES

- Dari - Native
- Pashto - Fluent
- English - Good working proficiency
- Urdu - Intermediate

IT & NETWORKING DETAILS

- LAN/WAN configuration and troubleshooting
- Network cabling and connectivity checks
- IT infrastructure support
- Linux Ubuntu Server and Windows Server support
- System installation and maintenance
- Printer, scanner, and device support
- IT inventory and asset tracking
- Backup and recovery support
